

Join the ranks of IT professionals who have helped make us the world’s largest and most trusted Cisco Learning Solutions Partner “Cisco Global Learning Partner of The Year”. For our Cisco training, we enhance Authorized Cisco curriculum with custom, hands-on exercises and labs delivered by professionals with real-world networking experience and a results-oriented approach to instruction.

Overview

CCNP Wireless is a professional-level certification that serves as the next step for individuals who have completed their CCNA Wireless certification and are interested in advancing their career in Cisco wireless technologies. The wireless network continues to grow, in part, because of the additional productivity that it brings to the world as a whole. Properly trained and certified individuals are needed to make wireless networks secure, cost-effective, and reliable. CCNP Wireless certification recognizes this growth, and acknowledges advanced-level skills and knowledge in Cisco wireless networking.

Please find below the required exam and recommended training to get your CCNP wireless certification.

Required Exams	Recommended Training	Days
